

### **Safe Environment Conduct Policy**

AGPA aims to be inclusive of a large number of participants, with many varied and diverse backgrounds. As such, we are committed to providing a friendly, safe, respectful, and welcoming environment for all, regardless of gender, sexual orientation, ethnicity, religion, political affiliation, disability, age, appearance or other personal characteristics and socioeconomic status.

With our goal of having AGPA Connect be an affirming and welcoming experience for all, it is important that we hear about the affirming and/or harmful experiences of our attendees.

All attendees will receive a general evaluation survey at the conclusion of the conference that will include opportunities for you to share details of the diversity related experiences you had at the conference.

If you had or witnessed an experience and would like more immediate support and/or organizational response, please reach out to any of the members of the Safe Environment Response Team listed below and they will respond to you as soon as possible.
